KOTAGIRI KIRAN TEJA

Database Administrator & Full-Stack Platform Architect

Email: **kotagirikiranteja@gmail.com** | Mobile: **+91 7337229232** | LinkedIn: **linkedin.com/in/kiran-teja-26ba3b258** | Location: **Andhra Pradesh, India**

EXECUTIVE PROFESSIONAL SUMMARY

Results-driven Enterprise Database Administrator and Full-Stack Platform Architect with 4+ years of hands-on expertise engineering high-availability database infrastructures (Oracle EBS, SQL Server AlwaysOn, PostgreSQL 16/18) and building mission-critical government software platforms from the ground up (FastAPI, Python 3.14, React 19). Single-handedly architected, developed, and deployed two flagship production systems for Government of Andhra Pradesh entities (APCRDA / AGIC)—the Enterprise RFQ e-Procurement Portal v2.0 and the Amaravati Land CRM & Executive Dashboard (ED-Tracker). Distinguished author of 15 official technical and operational documentation manuals spanning system architectures, database schemas, REST API specifications, and disaster recovery runbooks. Proven track record maintaining 99.99% enterprise database SLA uptime, tuning complex query bottlenecks, executing zero-data-loss backup/recovery strategies, and automating enterprise workflows.

TECHNICAL COMPETENCIES & ECOSYSTEM

Full-Stack & Systems Architecture	PostgreSQL 16/18, FastAPI (Python 3.14), React 19, Vite, SQLAlchemy 2.0, Pydantic v2, REST Microservices, JWT RBAC, In-Memory Streaming ZIP (io.BytesIO), Two-Way Excel Batch Validation Engines
SQL Server Administration & Dev	SQL Server (2012–2019), AlwaysOn Availability Groups, Failover Clustering, Database Mirroring, Transactional Replication, Log Shipping, T-SQL Stored Procedures, DMVs, Query Execution Plans, Deadlock Analysis
Oracle Database & EBS Admin	Oracle Database 11g/12c/19c, Oracle EBS 12.2 Administration, Rapid Cloning, Patching, Upgrades, Concurrent Manager Tuning, OEM 13.5, RMAN Backup & Point-in-Time Recovery, RAC & Data Guard (Exposure)
Data Engineering & BI	Power BI (Advanced DAX Modeling, Tabular Analytics, Executive Dashboards), SSIS ETL Package Design, Data Warehousing, Chart.js Dynamic Visualizations, Automated Financial Ledger Reconciliation
DevOps, Infrastructure & OS	Linux (Ubuntu, RHEL), Windows Server 2022, PowerShell Database Automation, Linux Shell (Bash), Docker Containerization, Nginx Reverse Proxy, Windows NSSM Daemonization, Disaster Recovery Orchestration

PROFESSIONAL WORK EXPERIENCE

Lead Database Administrator & Systems Architect | Entro Labs / APCRDA & AGIC

2025 – Present | Amaravati, AP

- **Single-Handedly Architected & Delivered Production Government Platforms:** Designed, developed, and deployed from scratch two flagship enterprise platforms: the **AGIC RFQ e-Procurement Portal v2.0** and the **Amaravati Land CRM & Executive Dashboard (ED-Tracker)**.
- **APCRDA Enterprise Database Development & Production Optimization:** Developed and maintained SQL Server 2019 database objects (tables, complex queries, stored procedures, views) supporting APCRDA Land Pooling Scheme (LPS), farmer lottery allocation, pension processing, and annuity workflows. Analyzed execution plans, utilized DMVs and index tuning to eliminate query bottlenecks, and scheduled SQL Server Agent jobs for automated backup and maintenance.
- **Enterprise Relational Database Modeling (PostgreSQL 16/18):** Engineered high-throughput schemas with ACID compliance, including the **RFQ_DB** (tender partitioning, 6-step vendor proposals, Annexures I/II/III, audit trails) and **crm.crm** (70-column master parcel tracking model with auto sequences).
- **Asynchronous Microservices Engine (FastAPI & Python 3.14):** Developed 30+ asynchronous REST API endpoints with Pydantic v2 validation, SQLAlchemy 2.0, JWT token authentication, granular RBAC (require_read/write_permission), and multi-officer tenancy isolation.
- **Dynamic In-Memory ZIP Streaming Engine:** Architected high-speed on-the-fly document packaging using Python zipfile and in-memory io.BytesIO streaming buffers for bulk multi-dossier vendor exports with zero disk clutter.
- **Two-Way Excel Batch Engine & Modern Frontend (React 19 & Vite):** Built custom 69-column Excel master template generators and automated bulk upload parsers with modal error-trapping, coupled with responsive React 19 UIs and Chart.js dynamic KPI graph builders.
- **SQL Server (2012–2019) High Availability:** Managed production AlwaysOn Availability Groups, failover clusters, and log shipping, maintaining a verified **99.99% system SLA uptime**.

• **Authored 15 Official Engineering Documentation Volumes:** Single-handedly authored complete 8-volume (RFQ Portal) and 7-volume (ED-Tracker) technical manual suites covering system architecture, ER dictionaries, REST APIs, and disaster recovery runbooks.

Oracle Apps DBA & Business Intelligence Developer | Techbulls Software Services

2022 – 2025 | Hyderabad, TS

• **Oracle EBS Lifecycle Administration:** Administered Oracle EBS 12.2 and Oracle Database (11g/12c/19c) environments, performing automated database cloning, concurrent manager tuning, patching, and multi-tier application support.

• **Enterprise Monitoring (OEM 13.5):** Configured Oracle Enterprise Manager dashboards for proactive CPU/memory capacity tracking, session wait-state analysis, tablespace growth prediction, and deadlock alert broadcasts.

• **Disaster Recovery & RMAN Backups:** Implemented robust zero-data-loss RMAN backup and recovery architectures (Full, Incremental, Cumulative), catalog administration, and routine simulated point-in-time recovery validations.

• **BI Dashboards & Data Warehousing (Power BI & SSIS):** Developed enterprise financial reporting dashboards in Power BI utilizing advanced DAX measures, data modeling, and automated SSIS ETL extraction pipelines.

• **Security Governance & Linux Automation:** Managed database security profiles, user access roles, and audit compliance policies. Created customized Linux Shell scripts for automated nightly maintenance, log rotations, and disk space threshold alarms.

FLAGSHIP PROJECTS & ACHIEVEMENTS

1. AGIC Enterprise e-Procurement & RFQ Portal v2.0 [PostgreSQL 16, FastAPI (Python 3.14), React 19, Vite, Tailwind CSS, SQLAlchemy 2.0, JWT RBAC, Streaming ZIP, Docker, Nginx]

Single-handedly engineered an end-to-end digital procurement platform for Amaravati Growth & Infrastructure Corporation Limited (AGIC). Modernized state procurement workflows by eliminating pre-fixed CE rates in favor of dynamic market pricing, complete EMD elimination, private officer review centers, and a 6-step vendor quotation wizard supporting infrastructure giants (L&T;, Tata, Navayuga, MEIL). Built in-memory ZIP document streaming engine (io.BytesIO) and authored the official 8-volume documentation suite.

2. Amaravati Land CRM & Executive Dashboard (ED-Tracker) [PostgreSQL 18, FastAPI, psycopg 3, React 19, Chart.js, OpenPyXL/Excel Engine, Windows NSSM]

Architected an executive tracking and CRM platform for Government of Andhra Pradesh leadership. Designed a dedicated 70-column PostgreSQL 18 relational schema (crm.crm) tracking 117+ prime land parcels across Amaravati with real-time analytics, capital outlay monitoring, milestone stage progression, and mutation audit logs. Engineered an automated two-way Excel integration with 69-column validation modals and authored the official 7-volume documentation suite.

3. APCRDA Enterprise Database Development & Production Optimization [Microsoft SQL Server 2019, T-SQL, Stored Procedures, Views, DMVs, Execution Plans, Indexing, SQL Server Agent, Backup & Recovery]

Engineered and maintained SQL Server 2019 database objects and business logic for the Andhra Pradesh Capital Region Development Authority (APCRDA). Implemented T-SQL workflows for Land Pooling Scheme (LPS), farmer lottery allocation, pension processing, and annuity distribution. Conducted query performance tuning via execution plans and DMVs, scheduled automated SQL Server Agent backup/maintenance jobs, and maintained strict data integrity across business-critical records.

4. AP Nirman Infrastructure Procurement [Oracle 11g, PL/SQL, Linux Shell, CFMS API]

Engineered public procurement workflows and financial settlement integrations with CFMS for government infrastructure projects. Designed high-throughput PL/SQL stored procedures, packages, and triggers, reducing report runtime by 40%.

5. BLIL Corporate Financial & Executive BI Intelligence Suite [Power BI, Advanced DAX, SSIS ETL, SQL Server 2019]

Designed scalable tabular data models and automated end-to-end SSIS ETL pipelines consolidating multi-source financial ledgers, drastically reducing monthly financial reconciliation cycles.

6. Production High Availability & Disaster Recovery Automation Suite [SQL Server AlwaysOn, Oracle RMAN, PowerShell, Bash, OEM 13.5]

Constructed proactive monitoring and automated disaster recovery failover architectures across SQL Server AlwaysOn Availability Groups and Oracle databases with automated DMV deadlock inspection.

AUTHOR OF 15 OFFICIAL TECHNICAL DOCUMENTATION VOLUMES

• **AGIC RFQ Portal Complete Documentation Suite (8 Volumes):** Vol 01: System Architecture & DB Design | Vol 02: User Manual & Operational Workflows | Vol 03: Codebase Directory Map | Vol 04: Production Deployment Guide | Vol 05: REST API Reference | Vol 06: Non-SoR Governance | Vol 07: Design System Guide | Vol 08: Master File Inventory & Disaster Recovery.

• **Amaravati Land CRM (ED-Tracker) Documentation Suite (7 Volumes):** Vol 01: Operations & User Manual | Vol 02: Technical Stack & Architecture | Vol 03: REST API Reference | Vol 04: Component Directory | Vol 05: Database Schema Dictionary & Credentials | Vol 06: Deployment & NSSM Services | Vol 07: Implementation & Master Troubleshooting Guide.

EDUCATION & PERSONAL DETAILS

Bachelor of Science in Computer Science (B.Sc.) — Acharya Nagarjuna University

• **Languages:** English, Telugu, Hindi | • **Location:** Bapatla District, Andhra Pradesh, India | • **Date of Birth:** 01 November 1997

I hereby declare that the information provided above is true and authentic to the best of my knowledge and professional experience. — ***KOTAGIRI KIRAN TEJA***
